Istanbul, Istanbul, Turkey | +905389370863

Experienced Software Engineer with a strong background in developing web applications using modern technologies such as React, Redux, and MUI. Skilled in creating dynamic, user-friendly interfaces and managing complex state logic. Proficient in both frontend and backend development, including MERN stack applications and Laravel projects. Demonstrated ability to handle all phases of the software development lifecycle, from design to deployment. Adept at problem-solving, collaborating in team environments, and continuously learning new technologies to enhance application performance and user experience. Passionate about sharing knowledge and contributing to the developer community through writing and tutorials.

Work Experience

Full Stack App Developer

Jan 2023 - Present

- Skilled Full Stack App Developer with expertise in creating cross-platform mobile applications using React Native & Flutter.
- Strong experience in building scalable and performant web and mobile applications, from UI design to back-end services.
- Proficient in integrating APIs, managing databases, and deploying apps across IOS and Android platforms. Familiar with modern development tools and practices, including agile methodologies and version control. Adept at collaborating in fast-paced environments to deliver high-quality solutions.
- Technical Skills :
 - Mobile Development : React Native, Flutter, Dart, JavaScript, TypeScript
 - Back-end : Laravel, Node.js, Express.js, MongoDB, Firebase, RESTful APIs, Sql, MySql Version
 - Control : Git, GitHub, GitLab
 - Tools & Technologies : Firebase, Docker, Redux,
 - Other : Agile, Continuous Integration/Deployment CI/CD, Authentication (JWT, OAuth)

Freelance Developer, Freelance Developer

Jul 2021 - Present

- Actively engage in freelance projects focusing on web development, adeptly handling both front-end and back-end tasks.
- Created user interfaces for websites with Adobe Photoshop. Developed web applications using HTML, CSS, and JavaScript.
- Implemented automated testing tools to ensure high quality code. Debugged existing application functionality and identified areas of improvement.

Projects

React / Laravel Full Stack Website Builder

Present

React / Laravel Full Stack Website Builder

Developed a full-stack website builder combining React for dynamic, interactive front-end interfaces and Laravel as a robust back-end framework. The platform enables users to design and manage websites seamlessly

Full Stack MERN / Multi-Service Business Platform

Present

Developed a web-based platform that enables users to: Share job opportunities and connect with job seekers.

Advertise businesses, services, and products to a targeted audience. Search for and discover local businesses and services.

Built using [React , Node , Express , Mongo], the platform focuses on user-friendly navigation, responsive design, and robust search functionality to enhance engagement and usability.

Store It - Your Go-To File Upload and Management Solution

Dec 2024

React Native / Video Uploader APP

Apr 2024

Full Stack MERN / E-commerce

Jun 2024

Laravel / Resturant Mangment

Nov 2023

Core Skills

Software Engineering Knowledge and Experience Academic Foundation I have a solid foundation in software engineering principles, which includes: Algorithms and data structures Object-oriented programming (OOP) Database design and management (e.g., SQL, NoSQL) Software development lifecycle (SDLC) Practical Experience I have worked on several projects that demonstrate my expertise, including: Web Applications: Using React and Redux for front-end development, Node.js and Express for back-end APIs, and MongoDB for database management. Mobile Apps: Leveraging React Native and Flutter to build cross-platform mobile applications. Blog and CMS Development: Designed and implemented blogging platforms with MERN stack, incorporating features like text editors (e.g., TipTap) and advanced state management. Technical Skills Programming Languages: JavaScript, TypeScript, Python, etc.

Frameworks and Libraries: React, Redux, Mongoose, Express, and more. Version Control: Git and GitHub for collaborative coding. Testing and Debugging: Experience with tools like Jest and Chrome DevTools. Key Accomplishments Successfully developed a BusinessesAndServices component for a React-based application, displaying dynamic grids of data. Resolved issues like rendering objects incorrectly in React by diagnosing state management errors. Designed and maintained scalable architectures for web and mobile applications. Team Collaboration Experienced in working collaboratively with designers, QA teams, and other developers to meet project goals efficiently.

Education

Kirklareli University

Jul 2024

licence Software Engineering

GPA 3.3
